

# HR people: HR Experts on demand

## Specific and qualified HR know-how on demand

With HR People, we offer you HR experts who can support your HR department in the short, medium and long term. Our HR community is broad and has expertise in HR functions, HR topics and technologies. We have in-house consultants and an extensive external network with many years of experience.

Given the increasing need for flexibility and the cost pressure on companies in the field of HR, we would like to offer you the opportunity not only to outsource services, but also to employ individuals temporarily in your company, either full or part time. There are many situations where external HR professionals need to be brought in.

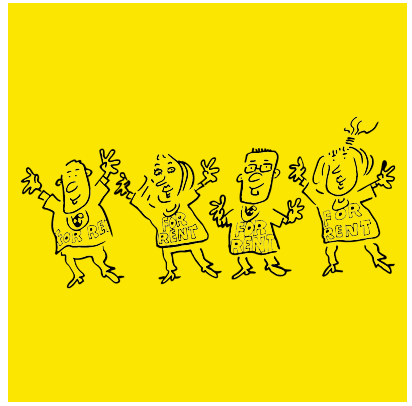

Here are some common examples:

- **Employee absenteeism** – The HR team is under pressure due to illness or long-term absences.
- **Ensuring expertise** – Specialist expertise is not available within the company or only needed for a short while.
- **Bridging peaks** – Many HR projects are currently running simultaneously and the deadlines set must be met.
- **Bridging personnel bottlenecks** – Short-term personnel shortages need to be overcome.

Why our HR People Community can make you happier? We offer you experts with the following focal points:
