Campus Expenses-Management SaaS

The software-service package for your expenses management

Today's travel and expenses management is mobile, user friendly and workflow based. This makes expenses transparent and spares your employees a lot of time and stress. Benefits from our software-as-a-services package and place your expenses management in our hands.

Our modern travel- and expenses-management solution is ultra lean, self-explanatory, and can be seamlessly integrated with Campus Admin if necessary. The software covers the entire expenses process: From the expenses application through the recording of the expenses incurred to payments to employees and booking with the HR and controlling teams. Benefit from massive time and cost savings for employees, managers and the finance department.

Book the service package

In contrast to a conventional software contract, a software-as-a-service (SaaS) contract is directly with the provider – in this case HR Campus – not with the developer. You will benefit from a better, fuller and faster service. Technical and legal patches are regularly updated. We monitor your systems directly and, in the event of a problem, we support you in accordance with our service level agreement (SLA). With SaaS you get cutting-edge HR solutions directly from the cloud – personalized for you and your company. You don't have to worry about updates of changes in legislation. HR Campus can provide you with personal support at any time.
