# SAP-UKA Interface

Efficient, holistic management of accidents, sickness and absences

Many SAP HCM and SAP SuccessFactors customers use UKA Solutions and Carema to process accident and absence notifications, automatically process daily allowances and manage absences. These are tried and tested HRM Systems solutions for medium-sized and large businesses. With the SAP UKA interface, relevant key data, absence data and organisational data is periodically transferred to UKA Solutions. This interface lets you prevent duplicates while also increasing the quality of your data. SAP UKA interfaces ideally integrate HRM Systems software solutions into your existing environment.
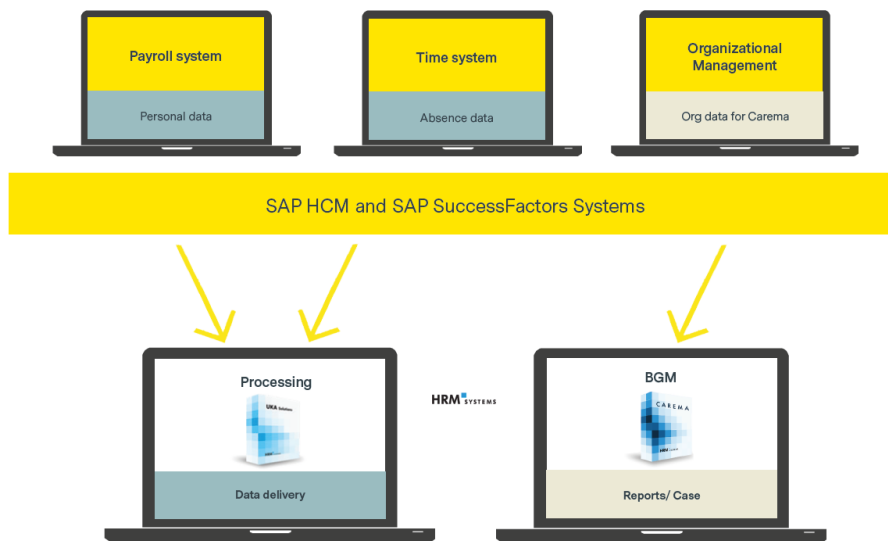

Electronic transfer

Do you create duplicate key data or absence data when dealing with case notifications and/or MSE/EO notifications? The HR Campus SAP UKA interface offers a convenient solution. You can centrally gather all key data, absence and organisational data in your SAP HCM system. Relevant information is periodically transferred to UKA Solutions via the SAP UKA interface. Finally, a rear interface is used to process the daily allowance relevant to wage accounting automatically in SAP. This not only significantly reduces the workload required for data collection but also improves the consistency and precision of your data while avoiding errors.

Central absence management

The SAP UKA interface provides HRM Systems software solutions with the necessary information to create a central tool for the management of absences by HR staff, payroll experts, health and safety agents and case managers. This digital solution is suitable for HR processes surrounding absences, prevention, processing and reporting right through to case management.

Highlights

- Flexible and parametrisable data provision from SAP to UKA Solutions

- Better data quality and consistency

- No redundant data collection

- Problem-free integration of your SAP systems

- Care and case management based on key/organisational data from SAP

- Many years of successful project experience between HR Campus and HRM Systems AG

- You can save time and money with this interface

HR Campus
