

SAP Jam Collaboration

Well networked – the progressive exchange of information and knowledge

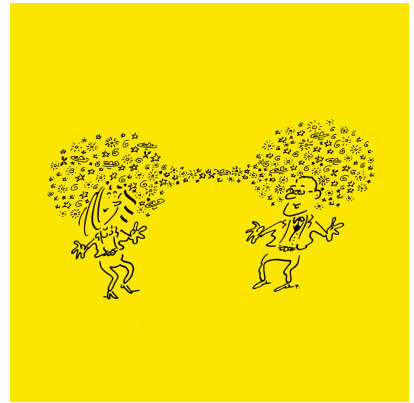

Make your employees and teams even more capable. With SAP Jam Collaboration, you can optimize cross-divisional and cross-departmental communication while facilitating exchange with external service providers and partners.

Networked working with SAP Jam Collaboration

Give your colleagues – and also your customers and external service providers – access to relevant information and applications at any time. The SAP Jam Collaboration platform offers you suitable collaboration options, which allow problems and tasks to be jointly solved on an ad-hoc basis. The cloud software supports all company areas, applications and processes. In this way, a single solution enables your colleagues, business partners and customers to work together in a productive and goal-oriented manner.

Active knowledge sharing and informal learning

Use SAP Jam Collaboration to offer your employees a knowledge platform on which anyone can share expertise with others. This makes it possible to find answers to specific questions faster. Create study groups for your employees by integrating with SuccessFactors Learning, motivating active knowledge sharing and informal learning in your company. Encourage interaction between students to develop more personal responsibility while reducing training costs.
