

SAP Litmos

Your learning management system

With SAP Litmos, you're relying on a cloud-based, modern, user-friendly learning management system. The solution can be implemented within minutes instead of months, can be easily operated by training participants and administrators, and includes an integrated course catalogue for various industries. Provide your employees with a learning management system that's fun to spend time in.

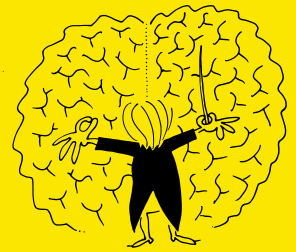

Motivate your staff with SAP Litmos

SAP Litmos lets you carry out trainings in the here and now. The solution consists of a high-performance learning management system, a commerce platform and a detailed course catalogue that makes it easy to manage the whole learning programme from system implementation to integration to ongoing administration.

Thanks to exceptionally rapid implementation, intuitive operation and modern design, working with SAP Litmos is fun from the very beginning. The user-friendliness for training participants and administrators of SAP Litmos has won over thousands of companies to date. Use the latest design to motivate your employees to educate themselves and create the greatest possible added value for your company.

Detailed course catalogue

Use the cross-industry and target group-independent experience of SAP Litmos and take advantage of existing training. SAP Litmos gives you access to a multitude of various training solutions for your industry or for certain targets groups within your company (e.g. sales or suppliers).

Highlights

- Ready in minutes not months
- Intuitive operation for training participants and administrators
- Detailed course catalogue
- User-friendly design
- 100% cloud technology
- Integration of reports and dashboards
- HR Campus is a certified SAP Litmos implementation partner and reseller

Intuitive operation and administration

Already have training and want to compile your sessions? No problem. It's easy to create new courses, so you can add your current training offerings to SAP Litmos. By forming teams, you can quickly and easily allocate a number of staff to individual courses and track their status.

SAP Litmos vs. SAP SuccessFactors Learning

SAP Litmos is a stand-alone solution that can be implemented in next to no time. The configuration options are somewhat more limited compared to the SuccessFactors Learning Module. An integration into the SuccessFactors Suite, for example, for an automated import of the employee master record or a jump tile from SuccessFactors, can be configured to suit individual customer requirements. We'd be happy to advise you on which learning management system would suit your system landscape.
