

SwissSalary 365®

Swiss software for payroll accounting

With SwissSalary 365®, you have swissdec 4.0 certified software with the full functionality of modern payroll accounting. Our cloud-based solution perfectly complements your existing ERP. We offer a variety of standardised interfaces, for example in your financial accounting. Get to know the smart solution.

State-of-the-art payroll software and master data management

SwissSalary 365® offers everything that a modern payroll software should offer – and much more. The master data administration is clearly designed and intuitive. Various salary types are already stored according to legal standards or can be adjusted manually.

The software is obtained from the Cloud and updates are directly checked by the manufacturer and installed. The bank master and the withholding tax rate are automatically adjusted by SwissSalary. Whether for small businesses or major corporations – SwissSalary 365® makes life easier. You will soon be able to record accident and illness claims directly in the system with the new Swissdec KLE standard and you can easily adjust social security rates yourself.

Access to SwissSalary 365® via desktop and mobile

SwissSalary 365® is accessible via a web interface, which can be operated via any browser on a computer or Mac, tablet or smartphone. The Microsoft app "Dynamics 365 Business Central" is available for Android, Windows and iOS devices and can be downloaded free of charge from the App Store. You can alternatively work in the SwissSalary® app. You can easily capture a mutation on the phone or create a test billing in Tram.

Highlights

- State-of-the-art payroll software
- 100% cloud-based solution
- Integration in Microsoft Office 365
- Integrated employee portal
- Browser access via mobile, tablet or desktop
- Swissdec 4.0 certified software
- Based on Microsoft Dynamics 365 Business Central
- Data storage in Switzerland
- Accident and illness reports with KLE

SwissSalary 365® can also be seamlessly integrated into the Office 365 product range. You can export your data to Microsoft Word or Microsoft Excel at any time or input your wages into Excel for example. SwissSalary 365® is available as an app on Dynamics 365 Business Central and is hosted by Microsoft. Your data has 256-bit encryption. Thanks to regular and automatic backups of your data, you can restore data to the minute for 35 days. This means your data is kept in a safe place and protected from loss at all times.

Access to SwissSalary 365® via the employee portal

Payslips can also be collected by your employees directly in the employee portal. Or you can customise your address or bank account number in just a few clicks – no need for tedious mutations. Do you need regular complex reports? Make sure that you have the handy add-in Power BI from Microsoft and create it within minutes.
